## TRAFFIC / SAFETY NOTICE

STM Traffic / Safety Notice No. ....1305.....

---

TITLE: PITT STREET CROSSOVER – OPERATING INSTRUCTIONS

DATE OF OPERATION: ..23/..10./ 2013...

### DETAILS OF NOTICE:

Commencing Wednesday 23 October 2013, the new crossover north of Pitt Street has been brought into use and will be known as "Pitt Street Crossover".

Double track (ie Up and Down) working will be in force between Railway Square Junction and Pitt Street crossover from that date.

The points of the Pitt Street crossover are former Melbourne points. A Melbourne type point bar is required to change the points. This point bar is to be collected from the OIC when departing for Sutherland and handed back when returning from Sutherland.

The points in the Up track may be trailed through in the Up direction.

NOTE:- At this stage, the points in the Up track are NOT spring loaded permanently set for the curve.

A tram returning from Sutherland will need to stop before the points and the Conductor must change the points for the curve and the tram will then proceed to the Down (Eastern)track.

The points in the Down track should remain set for the curve

The standing instructions covering speed over facing and trailing points, visually checking the lie of the blades when approaching facing points, and not stopping over points, must be observed.
